

# Clusteral Solidarity

April 27, 2024

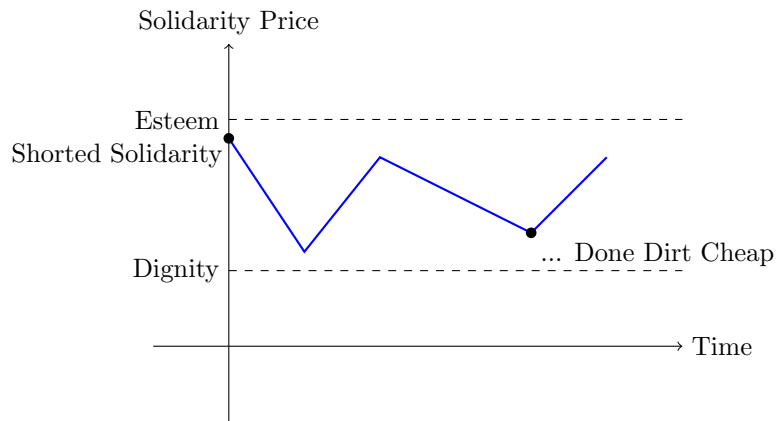

Figure 1: Graph representing a hedge on a short of a stochastic solidarity index.

## 1 Approach

It is difficult when we compare ourselves to others; though, we each consciously or subconsciously aim to express our taste and manifest grace. An aspect of grace is not holding others to the image of who they were; though, this is part and parcel with taking partial accountability (and ownership) for the wellness of our cluster. Allegiance, Sacrifice, and Diplomacy are three Forms that slice through and supplant this model, and [freedom](#) is the right to choose with whom your are in debt. Your [Dunbar Bowl](#) needs you, despite [Shrodinger's Fish](#).

## 2 Formation

- Surviving with Vitality
- Optimized Social, Scope, and Material Capital

- The Nuance of Deontological and Consequential Narratives
- So what? If your home team loses...

### 3 Execution

- Surviving with vitality

Survival with Vitality ([Survitality](#)) is existing and adapting within the flow of resources (the synapse). Just as how on a micro-level, it is natural for us each to express our taste (or manifest grace), so also is it natural for a military or pharmaceutical industry to impose their will. Both of these practices are aiming towards survitality. Just as the body has “Shakras”, International Shakras include:

- \* Beiring Straits
- \* Panama Canal
- \* Red Sea
- \* South China Sea

The imposition of will within [THE PLAN \(H.R.810\)](#) means colonizing the moon and setting up supply chains in the cis-lunar region, so we can have 4-hour deliveries. Fortunatley, there are none indigenous to the moon.

- Optimized Social, Scope, and Material Capital

Does the next decision make [cents, sense, and scents](#)? This is the optimum question when choosing 3, 7, or 12 variables (dimensions) for modeling conditions and distinguishing factors; because, within these dimensional models, the cross-product can be taken. Orthogonal vectors allow for Political [Screws](#), which lead to national longevity.

- The Nuance of Deontological and Consequential Narratives

The cause of all causes is The Good, and Forms “being in rooms locking in the [Responsibility Indices](#) of Clusters of Entities” indicate that right action is both based on agreements (duties) and on the outcomes bringing about the overall average good. Documentation for the sake of traceability is critical to knowing the likelihood of “hidden costs” and the likelihood of allocation pools “paying back their debts”. “Money laundering associated predicate offenses” are found with longitudinal anomaly detection and [fraud detection](#), and are dependent on communications being within layers of protocols that may be dipped from.

- So what? If your home team loses...

If your hegemeonic standard’s home team loses, their Esteem and Dignity options shift down. Your cluster’s overlapping hedges - on the common knowldge of the price of the fabric of solidarity - all have the hegemonic’s hedge as a conservative force tending to the inertia of the solidarity index.
